

GRADE 11

Foundations of Inquiry 11

SD43 Coquitlam

Foundations of Inquiry 11 recognizes that competence in an area of study requires factual knowledge organized around conceptual framework to facilitate knowledge retrieval & application. Classroom activities are designed to develop understanding through in-depth study both within and outside the required curriculum.

Credits: 4

Approval Date: Jun 2018

Hours: 100

Trax Code: Y

GOALS AND RATIONALE

The intent of this course is to identify the knowledge, skills & attitudes reflective of an effective inquiry stance toward learning in order to support students in investigating required or self-selected content.

BIG IDEAS

Personal design interests require the evaluation & refinement of skills. Products can be designed for life cycle. Tools & technologies can be adapted for specific purposes.

ADDITIONAL INFORMATION

Aboriginal Worldviews and Perspectives: Learning ultimately support well-being of self, family, community, land, spirit & ancestors. Learning is holistic, reflexive, reflective, experiential & relational. Learning involves recognizing the consequences of one's actions. Learning involves generational roles & responsibilities. Learning is embedded in memory, history & story. Learning involves patience & time. Learning requires exploration of one's identity.
