

GRADE 10

Sustainable Vegetable Production

SD33 Chilliwack

This is an introductory course to Sustainable Vegetable Production. Students will be expected to become familiar with the concepts of sustainable practices in agriculture. This unique outdoor course will take place at both the Sardis Secondary School Greenhouse and the Sardis Secondary School Farm (on Richardson Avenue). Students will be taught and introduced to food production through practical hands-on experiences. Students will learn skills in land preparation, planting, weed control, pest ma

GOALS AND RATIONALE

develop an understanding and appreciation of the nature of science as an evidence-based way of knowing the natural world that yields descriptions and explanations, which are in turn continually being improved within the context of our cultural values and ethics ? develop place-based knowledge of the natural world and experience the local area in which they live by accessing and building on existing understandings, including those of First Peoples ? develop a solid foundation of conceptual and

BIG IDEAS

Complex roles and relationships contribute to diversity of ecosystems. Ecosystems change over time, through humans or nature. Human practices affect the sustainability of ecosystems. Sustainable land use is possible in agriculture.

ADDITIONAL INFORMATION

Aboriginal Worldviews and Perspectives: • Learning ultimately supports the well-being of the self, the family, the community, the land, the spirits, and the ancestors. • Learning is holistic, reflexive, reflective, experiential, and relational (focused on connectedness, on reciprocal relationships, and a sense of place). • Learning involves patience and time. • Learning requires exploration of one's identity.
